The flexible solution for all corners: TITAN HV aluminium slab forming system

- Flexible adjustment to suit all room lengths, widths and angles plus slab penetrations with just a few system components
- All components are at the same level and form a stable grid
- Tried-and-tested, economic drop-head system
- Early striking without relieving the load on the props – so components can be reused sooner
- Entire assembly from below for maximum safety

Basic components

- ❶ Drop-head
- ❷ Main beam
- ❸ Secondary beam

Panels

- ❹ Mesh panel supports foot traffic
- ❺ Combi panel with integral sheeting

Our TITAN HV aluminium slab formwork results in good solutions that meets the requirements every time.
